

Presentation
Options for Video Tributes

Tribute videos may be presented in a number of different settings. During a night visitation the video may be shown in the lobby near the register book.

For daytime services the video may be presented prior to the service on a continuous loop or it may be incorporated into the funeral service.

Videos may also be presented at a church or other off site location, provided video equipment is not being used on site.

Video Tribute Information

Bradford-O'Keefe is pleased to offer video tributes to families we serve. You will find this video presentation helps the family and friends focus on a life lived instead of death. We recommend you submit **up to 75** still photos that we will produce into a video that can be shown at funeral visitations or during funeral services. The finished video will run approximately 5 to 9 minutes in length.

We offer many different DVD cover/label backgrounds, musical selections and DVD transition scenes.

Families are asked to bring pictures in the order in which they are to be shown. It is recommended that the photos be placed in chronological order (from childhood to retirement) then numbered. The themes you select should match the individual's lifestyle.
